# Committed to Local Australia

Leaving a positive effect on the community for years to come

## Keeping jobs local

Our teams thrive when we hire from local communities. Having home grown talent working in each location allows towns and regions to flourish alongside each Mitchell Water project.

## Growing regional Australia

Regional livability is driven by opportunities for families and services that grow to support and sustain the community they serve. Mitchell Water is committed to ensuring regional Australia flourishes while maintaining its roots.

## Looking after our land

We are consistently developing new innovations and construction techniques to minimise our impact on our environment. Our team engages with the local community and landholders and legislative authorities to ensure best land management practice.

## Protecting cultural heritage

At Mitchell Water we embrace diversity, respect the past and consult with traditional ownership groups to create a positive impact on both local communities and the environment.

## Supporting schools for your kids

We consistently resource local schools in practical ways, as well as support educational pursuits to enhance future education and career opportunities.

## Making life better

Our contribution to projects establishes essential energy, water, and associated infrastructure critical to keeping regional communities and local Australia moving forward. For Mitchell Water, each project is an opportunity to improve life for each local community we work in.
